1. Carbon Neutral Information

1A Introduction:

Cbus Property is a wholly owned entity of Cbus Super, the industry superannuation fund for the construction, building and allied industries, with funds under management exceeding \$94 billion at 30 June 2024.

Cbus Property has built a strong reputation by delivering market-leading approach to its development projects and investments that sets the benchmark for sustainable buildings. Cbus Property's net zero carbon strategy prioritises meaningful decarbonisation by energy efficiency, removing fossil fuels, and using renewable electricity. Cbus Property only relies on carbon offsets as a last resort. https://www.cbusproperty.com.au/. At ISPT, we recognise our duty to anticipate and manage the impacts of climate change as part of our responsible investment approach. We aim to mitigate the impact on our portfolio and operations through the efficient and effective use of natural resources to drive net positive environmental outcomes.

ISPT has committed to future generations by taking immediate action on climate change through carbon neutral certification. We've accomplished this carbon neutral position by managing climate risks in our portfolio and operations through energy efficiency, onsite renewables, offsite renewables through Power Purchase Agreements (PPAs), and then by offsetting the remainder of emissions with the use of 100% Australian Carbon Credit Units. | The Responsible Entity has defined a set building's emissions boundary (in terms of geographic boundary, building operations, relevance & materiality) as including the following emission sources | | Scope 1: Refrigerants, Gas/Fuels Scope 2: Electricity Scope 3: Gas/Fuels & Electricity, Water, Waste, Wastewater. |

Table 2. Declaration of excluded emissions

All emissions sources within the geographic boundary of the building that are excluded from the emissions boundary of this claim are declared below.

| Emissions sources not included in this carbon neutral claim | Description & justification of the exclusion |
|---|--|
| Retail tenancy light and power | Retail tenancy lighting, power and supplementary air-conditioning are excluded on the basis these are outside the operational control of the building owner. |

* if a hypelnik is not feasible, please send NABERS a screenshot of retirement, or attach as an appendix.
** Quantity is defined as the number of offsets purchased, regardless of eligibility. For example, Yarra Yarra

*** Eligible Quantity is the total Climate Active eligible quantity purchased. For all eligible offsets, this is the same number as per the quantity cell.

Offset surrender note:
Blinky Forest Carbon Project and ERF project -Willingsin Fire Project were originally purchased in 2022, with the remaining offsets used as a bank for future years.

Appendix A: Electricity Summary

Electricity emissions are calculated using market-based approach

Market-based method

The market-based method provides a picture of a business's electricity emissions in the context of its renewable energy investments. It reflects the emissions intensity of different electricity products, markets and investments. It uses a residual mix factor (RMF) to allow for unique claims on the zero emissions attribute of renewables without double-counting.

| Marked Based Approach | | |
|--|-----------|----------------------|
| Total renewables (onsite and offsite) (cell D45) | 1,005,448 | kWh |
| Mandatory * (RET) (cell D32) | 190,448 | kWh |
| LGCs voluntarily surrendered (cell D36+D37) | 815,000 | kWh |
| GreenPower voluntarily purchased (cell D34) | 0 | kWh |
| Onsite renewable energy consumed (cell D41+D43) | 0 | kWh |
| Onsite renewable energy exported (cell D40) | 0 | kWh |
| Total residual electricity (cell D44) | -976 | kWh |
| Percentage renewable electricity – (cell D46) | 100.00% | |
| Market Based Approach Emissions Footprint (cell M44) | -888 | kgCO ₂ -e |
| Location Based Approach | | |
| Location Based Approach Emissions Footprint (cell L47) | 863,846 | kgCO ₂ -e |

Note

N*

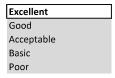

^{*} Voluntary - contributions from LGCs voluntarily surrendered (including via Power Purchase Agreements) and GreenPower purchases.

Appendix B: Waste Data Quality

For all Climate Active Carbon Neutral claims made via the NABERSpathway, the quality of waste data is evaluated to determine the accuracy and integrity of the calculated emissions from the building's waste. Waste data quality is categorised into one of five tiers ranging from poor to excellent.

Emissions from waste make up 8.12% of this claim's total emissions

The quality of waste emissions data for this claim is categorised as:

Appendix C: Refrigerant assessment details

Refrigerant emissions represent the global warming potential of refrigerant gases lost to atmosphere from the building's airconditioning and/or refrigeration equipment. There are two methods for accounting for refrigerant emissions, including:

Method 1 – Estimation based on a default annual leakage rate

Method 2 – Approximation based on records of top-ups"

Refrigerant emissions make up 0.00% of this claim's total emissions.

Refrigerant emissions were assessed as follows:

| Assessment method | Refrigerant emissions calculated per method (t CO2-e) |
|-------------------|---|
| Method 1 | Method 1 not applied |
| Method 2 | Method 2 not applied |
| Total | 0.00 |

Appendix D: Screenshots of offsets purchased

The Clean Energy Regulator has accepted the following voluntary surrender offer:

Account: Cbus Property Pty Ltd

Offer ID: 9976

Surrender type: Voluntary

Number of certificates: 815 LGC(s)

Date of offer: 10/12/2024

Date of acceptance: 20/12/2024

Reason for voluntary surrender: Altruistic purposes

Surrender note: Voluntarily retired on behalf of Building 447 Collins Street, Melbourne VIC to meet its carbon neutral claim against the Climate Active Carbon Neutral Standard in 2024, for the period - 01/10/2023 to 30/09/2024

Clean Energy Regulator note: Accepted.

Certificates:
